# SplashGuard C2-Z5 for SC2 and MC2 Sensors

## Cap for protecting the SC2 or MC2 sensor against splash water.

The cap is placed over the sensor head and secured by means of a detachable zip tie. It protects the sensor against rain and splash water coming from all directions.

The calibration can be carried out when the protective cap is mounted by using the suitable calibration adapter C2-Z4A. You have to recalibrate the sensor with the appropriate adapter when the splashguard is mounted, otherwise it will result in deviations in the behaviour of the sensor.

## APPLICATION

The splash guard is used in gas warning systems, which are mounted outside unprotected from the weather. It can also be used to protect the sensor during cleaning work.

## FEATURES

- Protection against rain, splash water and other weather conditions
- Easy installation
- Assembly and disassembly possible at any time due to detachable zip tie
- Calibration possible with suitable calibration adapter
